

# Join us in Nunavut

**Dr. Patty DeMaio loves working in Nunavut.**

I came for one year of adventure and am still here after more than 15! The mountains, glaciers, fiords, tundra and ocean are spectacular. There are daily opportunities to get out and see this land up close.

The people who live up here are warm, welcoming and have an interesting story to tell. The medical practice is exciting and challenging. My practice is well beyond what it would have been in southern Canada and supportive colleagues provide back-up whenever I need it. Every day at work is interesting and rewarding in many ways. I can't imagine a more fulfilling career in medicine.
